Hello and welcome!

Gifting is a way of connecting with our loved ones, that says you remember and care. Adhya offers a selection of unique product that are a responsible choice beyond just consuming 'more'. It is an alternative to the overwhelming range of machine-made product that lack the charm of a handmade piece.

The artisanal, hand-crafted product is sustainable in the livelihood it offers artisans and crafts people. It supports safe and decentralised production, that brings the benefits of fair trade to the maker.

The materials are either recyclable like metal or upcycled from stone, bone or horn waste by-products. They are certified at source as bonafide and non-exploitative.

The crafts are made relevant to contemporary tastes and homes by the intervention of design, and create a mindful fusion of the old and new.

Make buying a joyful and responsible decision.
